SYMANSKI

Nº2

CM:S INTERNATIONAL LAYOUT

The Internet-presentation of CM:S is now international. Since a few days you can reach the company under www.cm-symanski.de in German and English language. Other languages might follow.

Short after launching the company the web-page of CM:S was published. First in German language there was a short precise description of services on five pages.

Due to specialisation on European Community it was only a matter of time to start with an international presentation.

At the same time the web-side was completed with a site called „Schedule“. Here you will find actual events on which CM:S is participating.
